Wells within400ft joined to parcels.xlsx

The file names explain this but the parcel layer is from LaPlata county & well data is from CO Division of Water Resources. This was the source maps that we used to plot out the reverse 911 call.

Again, not sure how much this will be of interest or not, but more data if its useful.

Pete,

Attached, I have updated the tables and maps to include all the parcels within 400 feet of the river. This does not include parcels served by the Animas Water Company or parcels inside Durango City Limits.

I also created the attached table showing all wells within each parcel, so each row represents one well that is within 400 feet of the Animas and the related parcel information. (So multiple wells on the same parcel all show up on this list). Right now this table includes areas both north and south of town.

Let me know what you need next.

Thanks,

Trevor Downing
Geologist
